Release Notes—KONA LS Version 1.2.1

General

If you are installing your KONA LS hardware into a computer that has previously had another video capture card or drivers, we recommend running the AJA KONA Conflict Checker utility BEFORE installing the KONA software. The AJA KONA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software. Also, please read the "ReadMeFirst.PDF" document on the installation CD, particularly if you are installing for the first time.

In This Release

- Audio level adjustment for input and output has been re-enabled. The control panel will continue to lock the input gain to unity if selected.
- Added the KONA uncompressed codec back into the installer to improve image quality.
- Improvements to Analog input switching and black level controls
- Improvements to default proc amp values on new installations.
- Improvements to Timing values.
- Fixes to some 720p and NTSC 8 Bit to DVCPro50 Easy Setups.
