Release Notes—KONA LS Version 1.2

General

If you are installing your KONA LS hardware into a computer that has previously had another video capture card or drivers, we recommend running the AJA KONA Conflict Checker utility BEFORE installing the KONA software. The AJA KONA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software. Also, please read the "ReadMeFirst.PDF" document on the installation CD, particularly if you are installing for the first time.

In This Release

- Input Analog ProcAmp feature
- Line 21 captioning decoding (during capture) and encoding (playback) for closed-captioned DV-25 and DV-50 compressed clips
- Playback support for IMX 525/60 50 Mbps and 625/50 50 Mbps compressed clips
- Improved support for VTRXChange
- Added support for RGBA playback in Final Cut Pro
- Timecode Burn-in (with select playback applications)
- RP-188 Timecode capture (with select capture applications)
- 640x480 frames now play back centered in video output

Improvements

- Improved serial driver reliability
- Improved performance with "Black" default output
- Improved playback startup and A/V sync with some QuickTime applications
- Field/frame display on Pause now works correctly for DV sources
- Final Cut Pro Dynamic RT works more reliably
