Release Notes—KONA 3/2, LH/LHe, & LS/LSe Version 1.2.2

General

If you are installing your KONA hardware into a computer that has previously had another video capture card or drivers, we recommend running the AJA KONA Conflict Checker utility BEFORE installing the KONA software. The AJA KONA Conflict Checker will help you identify old drivers or software files that need to be removed before installing the new software. Also, please read the "ReadMeFirst.PDF" document on the installation CD, particularly if you are installing for the first time.

In This Release

- **For Kona 2, Kona 3, and Kona LH:** Support added for Final Cut Pro version 5.1
- **For all PCIe Kona Cards (3/LSe/LHe):** Fixed Macintosh PCIe computer startup issues when additional 3rd party cards were also installed in the system.
- **For all Kona Cards:** Easy Setups Improved.

Final Cut Pro Version 5.1 Note

In the setup tab of the Kona Control Panel application is a new checkbox called "Final Cut Pro 5.1+ Compatible". If you are running Final Cut v5.1 or later, this checkbox should be checked. If this checkbox is not set correctly (off when it should be on, or on when it should be off), the accuracy of captures may be affected.
