

## KONA 3 Installation and Operation Manual

---

The KONA 3 Installation and Operation Manual is located on the Software CD shipped with KONA 3. The manual is a PDF that you can drag and drop onto your Mac hard drive or read directly from the CD. Adobe Acrobat reader is required to view the file. To provide you with the best documentation possible, AJA will periodically update the manual and place the latest version on the KONA Support page on the AJA website. Check this URL location for the latest version:

*[http://www.aja.com/support\\_kona.html](http://www.aja.com/support_kona.html)*

This manual covers the installation and operation of KONA 3 and discusses using it with Final Cut Pro and other applications.

## Latest Software and Release Notes

---

To ensure you are running the very latest KONA 3 software, also check the KONA support page for software notices, answers to frequently asked questions (FAQs), and new software versions: *[http://www.aja.com/support\\_kona.html](http://www.aja.com/support_kona.html)*

## If You're Upgrading From Another Brand of Video Card

---

If your PowerMac has previously had another video capture or multimedia card installed, ensure you remove the card and uninstall any related software before installing KONA 3. This will prevent any hardware or software conflicts.

**Note:** KONA 3 will operate properly on a PowerMac that also has an AJA Io installed.

Locate the *AJA KONA Conflict Checker* utility found on the KONA 3 installer CD (Utilities Folder) and run it to locate software from other manufacturers that might interfere with proper KONA 3 operation. Then use it to remove all conflicts found (if any).

## To Keep Your Existing Easy Setups

---

The AJA Kona Software installer will overwrite all of the files in the KONA 3 Easy Setups folder, located in the /Library/Final Cut Pro System Support directory. If you have stored any Easy Setup files of your own in this folder, or if you have changed any of the AJA-installed settings and wish to keep them, we recommend making a copy of this folder before running the KONA Software installer. After the installation is finished, you may copy any files you wish to keep back into the KONA 3 Easy Setups folder.
