Chapter 1 – Introduction

Overview

AJA’s U-TAP Mini-Converter series provides video professionals with inexpensive, extremely compact devices that convert an HDMI 1.4a or 3G-SDI video stream to USB 3.0. U-TAP accepts up to 1920x1080 HDMI or SDI inputs ranging from 23.98 fps up to 60 fps. The input signal is automatically scaled (if necessary) to the output size determined by the host application.

The USB 3.0 interface provides enough bandwidth for full broadcast-quality video and audio, available if the host environment can support that bandwidth. U-TAP is powered via the USB 3.0 connection with no need for an additional power supply, minimizing cabling and maximizing portability.

NOTE: U-TAP is compatible with standard UVC video/UAC audio drivers, which means wide USB support by OS X and Windows operating systems, with no need to install special drivers, and can work directly with a broad range of video applications (for example, VLC or QuickTime player).

Two models of U-TAP are available, each with different input capabilities.

U-TAP Features

- One USB 3.0 port
- 8-bit video support
- 2-Channel embedded audio support
- Rugged compact size
- Power via USB

U-TAP-HDMI Models

- One HDMI v1.4a input

NOTE: U-TAP does not support HDCP.
U-TAP-SDI Models

- One 3G-SDI BNC input
- One 3G-SDI BNC looping output

Video Signal Formats

The Video Signal Formats supported by U-TAP are listed in Appendix A: Specifications (see page 11).

U-TAP Firmware

The latest U-TAP-HDMI and U-TAP-SDI firmware is installed on the units before shipment. The firmware can be updated using a downloadable zip file for either PC or Mac that includes readme instructions and all the required files.

Chapter 2 – Installation

Unpacking U-TAP

As you unpack U-TAP, carefully examine the unit to ensure that nothing was damaged during shipment. If you find any damage, immediately notify the shipping service and supply them with a complete description of the damage. AJA will repair or replace damaged units. If you find shipping damage, contact your AJA dealer or distributor for details on how to have your U-TAP repaired or replaced.

Save packing materials and the shipping box. If you ever require service or move your system—use the packaging materials and box for safe shipment.

After you unpack your U-TAP, go to the AJA website to download the latest software package and updated documentation. You will need a USB cable to connect to your computer.

Installation Overview

The installation and setup of U-TAP is very simple. The steps of installation and configuration are discussed here and summarized as follows:

1. Unpack the shipping box (see above).
2. Ensure that appropriate application software is installed on your USB equipped computer, as detailed in its user documentation.
3. Connect the U-TAP USB output port to your computer, using the provided cable. The U-TAP is powered through the USB 3.0 port.

NOTE: The first time U-TAP is connected to a computer extra time may be required for the OS to access and configure the appropriate drivers. On Windows machines could take from 3 to 5 minutes. On Macs this time should be much shorter. Each OS should report successful driver installation. Subsequent U-TAP USB connections should occur immediately.

4. Connect the SDI or HDMI input to your source device.
5. U-TAP will now be operational, automatically detecting the input signal format and decoding the video (and two channels of embedded audio if present) to the USB output.

NOTE: Connecting multiple U-TAPs could compromise power delivery, and excessive USB bus traffic (from another U-TAP or other devices sharing that USB bus) can reduce the computer’s performance.

6. Launch your video application on the connected computer and use its UI controls to access the video and audio being converted by U-TAP. For example:
   • For VLC, go to Media/Open Capture device, and select U-TAP.
   • For QuickTime Player, go to File menu, click New Movie Recording, and select U-TAP using the down arrow next to the record button.
Firmware Update Procedure

U-TAP firmware and updater .zip files are available for download from the AJA website:

1. Download from the AJA website the free AJA_U-TAP.zip package for your computer operating system.
   - AJA_U-TAP_Win_.zip
   - AJA_U-TAP_Mac_.zip
2. Extract the .zip file on your computer.
3. Connect the U-TAP Mini-Converter to your computer with the provided USB 3 cable.
   
   NOTE: Only one U-TAP should be connected to your computer when updating firmware.

4. Run the .dmg or .exe file and install the Updater application.
5. Launch the AJA U-TAP Updater application. If a connected U-TAP is found, a window opens reporting the current firmware versions installed and the versions available for update.
   
   NOTE: If a U-TAP is not detected, a No Module Connected message is displayed.
6. Click on the Update button to update the U-TAP firmware.

7. A progress bar will report the progress of each firmware update.

**NOTE:** Macs typically require 2 or 3 minutes to install the U-TAP firmware. Windows machines typically install the U-TAP firmware in about a minute.

8. When complete, a message indicates the U-TAP must be rebooted.

9. Reboot the U-TAP by disconnecting and reconnecting the USB cable.

10. Your U-TAP will now be operational with the new firmware.
Chapter 3 – Operation

Introduction
Once installed, U-TAP operation depends on the application being used, and often can be extremely simple. U-TAP works with each application using the standard signal routing methods used by that application.

Quicktime Operation
As an example, for QuickTime operation on Mac OS, simply launch QuickTime, click on the menu button next to the record button, and then select the desired U-TAP and signal sources.

Figure 8. Quicktime U-TAP Operation
Multiple U-TAP Mini-Converters can be connected to the computer simultaneously. Each U-TAP unit is given a uniquely numbered name before shipment from the factory.

Appendix B – Safety and Compliance

Federal Communications Commission (FCC) Compliance Notices

Class A Interference Statement

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15, Subpart B of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Canadian ICES Statement

Canadian Department of Communications Radio Interference Regulations

This digital apparatus does not exceed the Class A limits for radio-noise emissions from a digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications. This Class A digital apparatus complies with Canadian ICES-003.

Règlement sur le brouillage radioélectrique du ministère des Communications

Cet appareil numérique respecte les limites de bruits radioélectriques visant les appareils numériques de classe A prescrites dans le Règlement sur le brouillage radioélectrique du ministère des Communications du Canada. Cet appareil numérique de la Classe A est conforme à la norme NMB-003 du Canada.

European Union and European Free Trade Association (EFTA) Regulatory Compliance

This equipment may be operated in the countries that comprise the member countries of the European Union and the European Free Trade Association. These countries, listed in the following paragraph, are referred to as The European Community throughout this document:

Aviso! Utilize apenas equipamentos/acessórios especificados e/ou vendidos pelo fabricante.

Avviso! Utilizzare soltanto i collegamenti e gli accessori specificati e/o venduti dal produttore.

Warning! Refer all servicing to qualified service personnel. Servicing is required when the device has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the device, the device has been exposed to rain or moisture, does not operate normally, or has been dropped.

Avertissement! Référez-vous au personnel de service qualifié pour tout entretien. L’entretien est exigé quand l’appareil a été endommagé de quelque manière que ce soit, par exemple lorsque le cordon d’alimentation ou la prise sont endommagés, que du liquide a été versé ou des objets sont tombés dans l’appareil, que l’appareil a été exposé à la pluie ou à l’humidité, ne fonctionne pas normalement ou est tombé.

Warning! Das Gerät sollte nur von qualifizierten Fachkräften gewartet werden. Eine Wartung ist fällig, wenn das Gerät in irgendeiner Weise beschädigt wurde, wie bei beschädigtem Netzkabel oder Netzstecker, falls Flüssigkeiten oder Objekte in das Gerät gelangen, das Gerät Regen oder Feuchtigkeit ausgesetzt wurde, nicht ordnungsgemäß funktioniert oder fallen gelassen wurde.

¡Advertencia! Consulte al personal calificado por cuestiones de reparación. El servicio de reparación se requiere cuando el dispositivo ha recibido cualquiera tipo de daño, por ejemplo cable o espigas dañadas, se ha derramado líquido o se han caído objetos dentro del dispositivo, el dispositivo ha sido expuesto a la lluvia o humedad, o no funciona de modo normal, o se ha caído.

Aviso! Remeta todos os serviços de manutenção para o pessoal de assistência qualificado.
