KONA LS

Read This Bulletin Before KONA LS Installation

KONA LS Installation and Operation Manual

The KONA LS Installation and Operation Manual is located on the Software CD shipped with KONA LS. The manual is a PDF that you can drag and drop onto your Mac hard drive or read directly from the CD. Adobe Acrobat reader is required to view the file. To provide you with the best documentation possible, AJA will periodically update the manual and place the latest version on the KONA Support page on the AJA website. Check this URL location for the latest version:

http://www.aja.com/support_kona.html

This manual covers the installation and operation of KONA LS and KL-Box and discusses using it with Final Cut Pro and other applications.

Latest Software and Release Notes

To ensure you are running the very latest KONA LS software, also check the KONA support page for software notices, answers to frequently asked questions (FAQs), and new software versions: *http://www.aja.com/support_kona.html*

If You're Upgrading From Another Brand of Video Card

If your PowerMac has previously had another video capture or multimedia card installed, ensure you remove the card and uninstall any related software before installing KONA LS. This will prevent any hardware or software conflicts.

Note: KONA LS will operate properly on a PowerMac that also has an AJA Io installed. It *cannot* be used on a system that has another KONA card installed; only one KONA card can be installed in a mac.
