

Ki Pro GO: Approved Media List v3.0

Tested Media and Configuration Information for USB Drives

Media Formatting Note:

In all cases and to obtain the best results, AJA Video Systems recommends formatting all media to exFAT prior to use with Ki Pro GO, due to file size constraints with other formats. In some cases, the drives ship formatted as NTFS. Those drives MUST be reformatted to exFAT prior to use, and this is indicated in bold type in this document.

NOTE - It is recommended that the SSD drives listed in this document be used for redundant multi-channel recording with Ki Pro GO.
