

Mini Config

Release Notes—Version 1.1.0

General

This release is recommended for all Mini Config users. It adds features, improves operation and fixes issues present in the earlier release versions.

Supported Products

- HDP2, Hi5-3G

New Features

- The new HDP2 module now supported

Improvements

- Improved Mini Config User Interface

Installing the Latest Software

The mini-converters come from the factory with a software CD and pre-installed with firmware. To ensure that you have the most current version of software/firmware available, please check the AJA website. To get the software, point your browser to:

<http://www.aja.com/support/converters/converters-mini-rackmount.php>

Current and past releases of the Mini Config software are available. Once there, the Mini Config software files can be selected to download for configuring and upgrading your mini converter module

Product User Manual

The manual provided with the mini-converter describes updating the software; please refer to it when updating software. The product manuals are located on the CD and installed with the software in the /AJA/Mini Config/Documentation/ folder in your start menu. The manual is also available online for download, here:

<http://www.aja.com/support/converters/converters-mini-rackmount-documents.php>
