Ki Pro Rack Release Notes - v6.0

Firmware update for Ki Pro Rack

Introduction

This firmware update provides improvements for Ki Pro Rack. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of www.aja.com.

Improvements and Enhancements

- Enhanced Closed Caption recording/playback support for CEA 708 captioning as HD ProRes 720p 59.94 and 1080i 59.94 only.

- Enhanced Closed Caption recording/playback support for CEA 608 captioning as SD ProRes 525i 59.94 only.

- Limitation: The Avid DNxHD codec at any frame rate or PAL frame rates for the ProRes codecs do not support recording/playout of closed captions with Ki Pro Rack.

- Limitation: Files with closed captions recorded using the Ki Pro Rack will playback normally from the Ki Pro Rack.

- Limitation: Externally sourced clips containing closed captions may not be compatible with Ki Pro Rack playback, this includes those created with FCPX, FC7, Avid Media Composer or Adobe Premiere.

- Expanded web UI playlist feature which now allows the user to scroll though 25+ playlists within the browser (previously limited to 25 onscreen).

Firmware Update Considerations

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.

- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI.

- Some clips created by Ki Pro Rack may cause Final Cut Pro 7 to bring up a "not optimized" prompt when imported. These clips are valid and can be used within Final Cut Pro 7.

- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.

Technical Support

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
