

# Ki Pro Ultra Release Notes – v1.2.1

## Firmware update for Ki Pro Ultra v1.2.1

### Introduction

---

This firmware update is a maintenance release for Ki Pro Ultra. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of [www.aja.com](http://www.aja.com).

### Enhancements

---

- Various small enhancements within the Ki Pro Ultra RS-422 machine control functionality have allowed deterministic playback to be implemented, meaning that multiple RS-422 connected and controlled Ki Pro Units will now playback synchronously.

### Improvements

---

- Ki Pro Ultra NLE clip playback compatibility has been improved.
- An issue where fixed static timecode caused the system to display a false recording state has been fixed.
- In 'Remote Only' mode, TC In setting is now accurately reflected.

### Firmware Update Considerations

---

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.

- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI.
- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.

## Technical Support

---

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
