

RovoControl Release Notes – v2.0

RovoControl v2.0

Introduction

This software update is a major new feature release for RovoControl. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of www.aja.com.

New Features

Compatible with Mac[®] and Windows[®], RovoControl v2.0 is powerful, free software that allows users to control both RovoCam from companion HDBaseT products in the RovoCam ecosystem, including RovoRx-SDI, RovoRx-HDMI and Corvid HB-R.

New Key features include:

- New Preset Mode(s) allowing for ePTZ and Global preset control
- Improved auto and manual spot focus options, offering better focus for off center subjects
- New low delay mode improves latency and removes image stabilization while in use
- Manual WB mode with R and B value color value sliders
- Spot Focus and Spot Aperture Controls

Enhancements

Minor bug fixes and various improvements have been made, including:

- Improved UART/RS-232 support on third party RS-232 adapters
- Greater color and white balance control for users, improving the ability to match other cameras
- Gamma detail and visibility enhancer settings added to UI
- Greater color and white balance control for users, improving the ability to match other cameras

Firmware Update Considerations

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.
- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI.
- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.

Technical Support

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
