AJA Mini-Config Release Notes - v2.21.2

Control Software for AJA Mini-Converters

General v2.21.2

This version of Mini-Config incorporates feature enhancements for the 12GM and Hi5-3D Mini-Converters.

Users of AJA Mini-Converters other than those listed above will not gain new functionality with this version of Mini-Config, however it is recommended to migrate to the most recent version even when using non-updated Mini-Converters.

Improvements

12GM

- Added Two Sample Interleave (2SI) to Square Division (Quadrant) pixel mapping.
- Added Square Division (Quadrant) to Two Sample Interleave (2SI) pixel mapping.
- Added a new analysis tool, (Input Timing tab), that displays any timing differences between SDI inputs.

Hi5-3D

- Added the ability to swap the Left and Right SDI inputs using AJA's Mini-Config application and/or the Hi5-3D physical dipswitch controls. Note that the functions for dipswitches 6, 7 and 8 have been modified to support this new feature.

Installing the Latest Software

Mini-Converters come from the factory with the most current version of firmware pre-installed. To get the latest version of Mini-Config, visit the AJA website support area and select your Mini-Converter from the list:

https://www.aja.com/category/mini-converters#support

The Mini-Config software can be found in the Software section of the support page for your Mini-Converter. Previous releases of the AJA Mini-Config software are also available in the Software Archive section for each supported Mini-Converter.

Firmware Upgrade Procedure

The manual provided with your AJA Mini-Converter describes the firmware update process; please refer to it in order to properly update your firmware. The product manuals are also installed with the software in the /AJA/Mini-Config/ Documentation/ folder.

Individual product manuals are available online for download from the Mini-Converter section of the AJA website:
