

# RovoControl Release Notes – v3.0

## RovoControl v3.0

### Introduction

---

This software update is a major new feature release for RovoControl. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of [www.aja.com](http://www.aja.com).

### New Features

---

Compatible with Mac<sup>®</sup> and Windows<sup>®</sup>, RovoControl v3.0 is powerful, free software that allows users to control both RovoCam from companion HDBaseT products in the RovoCam ecosystem, including RovoRx-SDI, RovoRx-HDMI and Corvid HB-R.

New Key features include:

- New zoom shuttle control
- Selectable preset modes: Camera, ePTZ and Global
- Preset naming has been added
- New keyboard shortcuts are included
- Status information display
- USB game controller compatibility

## Firmware Update Considerations

---

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.
- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI.
- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.

## Technical Support

---

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
