

# AJA HDR Image Analyzer Software Installer

Release Notes: 2018 Release Build 39212

## Introduction

---

This software is the first release version that ships pre-installed on AJA's HDR Image Analyzer. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of [www.aja.com](http://www.aja.com).

## Usage Notes

---

- You will need to provide your own keyboard, mouse and monitor. We recommend an UltraHD Display Port Monitor for best results.
- You can use any of the Display Port outputs of the graphics card.

## Software Re-install Considerations

---

- You should not need to re-install HDR Image Analyzer v1.0 software and these notes are provided as a preliminary guide for future software releases or re-installation when AJA Support suggests absolutely necessary.
- AJA's HDR Image Analyzer ships with the latest software preinstalled.
- Updates to the software will be available at:  
<https://www.aja.com/products/support/hdr-image-analyzer>
- To update HDR Image Analyzer software:
  1. Download the .zip file and extract and copy the .ajas file to a USB stick.
  2. Insert the USB stick into a rear USB port on the HDR Image Analyzer chassis.
  3. Go to Help > Update Analyzer.
  4. Select the .ajas file on the USB stick and click Select File.
  5. The software will be installed, and when complete the message "Preparation Complete, please restart Analyzer" appears.
  6. Click on the Analyzer > Application Restart menu item to complete the update.

## Technical Support

---

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
