

AJA HDR Image Analyzer Software Installer

Release Notes - 2019 Release Build 39287

Introduction

This software is a HDR Image Analyzer bug Fix release.

- UltraHD HFR Level B Loop through was not working properly.

Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the [Support section of www.aja.com](https://www.aja.com/support).

Usage Notes

- You will need to provide your own keyboard, mouse and monitor. We recommend a UltraHD Display Port Monitor for best results.

Software Re-install Considerations

- AJA's HDR Image Analyzer ships with the latest software preinstalled.
- Updates to the software are available at:

<https://www.aja.com/products/support/hdr-image-analyzer>

- To update HDR Image Analyzer software:
 1. Download the .zip file and extract and copy the .ajas file to a USB stick.
 2. Insert the USB stick into a rear USB port on the HDR Image Analyzer chassis.
 3. Go to Help > Update Analyzer.
 4. Select the .ajas file on the USB stick and click Select File.
 5. The software will be installed, and when complete the message "Preparation Complete, please restart Analyzer" appears.
 6. Click on the Analyzer > Application Restart menu item to complete the update.

Known Issues, Limitations and Notes

General

- You can use any of the Display Port outputs of the graphics card.
