

RovoControl Release Notes v3.0.1

RovoControl v3.0.1

Introduction

This software update for RovoControl on macOS offers compatibility with the latest Catalina operating system, v10.15.x. Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found in the Support section of www.aja.com. Compatible with Mac® and Windows®, RovoControl v3.0 is powerful, free software that allows users to control both RovoCam from companion HDBaseT products in the RovoCam ecosystem, including RovoRx-SDI, RovoRx-HDMI and Corvid HB-R.

New Features, Updates and Improvements in v3.0.1

- Compatibility with macOS Catalina v10.15.x

Features, updates and improvements in previous release

Version 3.0

- New zoom shuttle control
- Selectable preset modes: Camera, ePTZ and Global
- Preset naming has been added
- New keyboard shortcuts are included
- Status information display
- USB game controller compatibility

Initial Setup, Control and Updating Firmware

- AJA recommends a Factory Reset under the CONFIG menu prior to updating firmware.

- After a firmware update, the web browser (Safari, Firefox, etc.) may lose its connection. A refresh of the web browser will reconnect the web UI.
- Do not attempt firmware updates while recording is in progress. Be sure the device is in the stopped state before performing a firmware update.
