

# AJA OG-FS-Mini – Release Notes v1.7

## Release software v1.7 for OG-FS-Mini

### Introduction

---

OG-FS-Mini openGear card software v1.7 is a maintenance release. It improves how signal rates are displayed in DashBoard. It is highly recommended that you update to this version of software.

Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found on the [OG-FS-Mini Support Page](#).

### Features, Updates and Improvements in v1.7

---

#### Version 1.7.13

- Signal rates now shown in Fields instead of Frames when processing Interlace on the Input and Output.
- OG-FS-Mini units with an Assembly number equal to or greater than 107881-R4 will only work with Software version 1.7 or greater. To check compatibility, see the “Assembly” field on the “Card Tab”.

### Features, Updates and Improvements in Previous Releases

---

#### Version 1.6.39

- New A/V Offset control sets how embedded audio delay is managed.

#### Version 1.5.1

- Video and audio outputs can be configured to mute with a 0-15 seconds delay timer or black image when no active input video signal is detected.

#### Version 1.4.5

- Add Follow Input and Follow REF options for the output format.
- Improved processing of 1080p input signals.

- Improved PsF input detection for all formats.
- Removing support for 2K formats.

### Version 1.3.1

- Initial Firmware release for OG-FS-Mini
- openGear compatible card
- Utility frame sync function times input signals to an external reference
- Supports bi-level and tri-level references
- High quality 10-bit video processing
- Low latency processing, nominal video delay of 1 frame
- Freeze (on input signal loss) to black or last good frame
- Synchronizes 3G, HD and SD video formats
- Simultaneous SDI and HDMI outputs
- 16-channel embedded SDI audio I/O
- 8-channel HDMI output audio
- 2x 3-pin terminal block connectors for analog audio output
- Utility frame rate conversion, supports 3:2 pulldown
- Up, down, cross conversion between 3G, HD and SD video formats
- AFD input detection, down-convert control
- Remote configuration through Ross DashBoard software
- Rear I/O card included
- Compatible with OGX, OG3 and DFR-8321 openGear frames
- Five-year warranty
- DashBoard Support with Smart Control:  
<https://www.opengear.tv/frame-and-control/control-system/download/>
- For additional information, please refer to the OG-FS-Mini section of the AJA website:

## DashBoard Initial Setup, Control and Updating Firmware

---

*Note: DashBoard software (free) is needed to update FW, configure and monitor AJA openGear DashBoard supported cards.*

1. Check the AJA website for new software for your OG-FS-Mini. If new software is found, download it and uncompress the file archive (zip). <https://www.aja.com/family/opengear#support>
2. Click the Upload button in the lower panel of the DashBoard Control System to open the Upload Software Wizard.
3. From the Upload Software Wizard window, select Browse.
4. Navigate to the location of the downloaded .bin file containing the software update. Select the .bin file, then select Open. The Upload Software Wizard window displays characteristics of the selected file for uploading.
5. Click Finish.
6. When the progress bar indicates that the uploading is finished and status indicates "Complete," click OK.
7. To verify the version of software or firmware currently installed on your card, select the Card tab from the center panel of DashBoard.

*NOTE: Before the upload begins, DashBoard will erase the firmware on the card, taking approximately 20 seconds.*

## Technical Support

---

AJA Technical Support is free and available to help you answer questions or resolve issues with any of your AJA products.
