

# AJA OG-Hi5-4K-Plus – Release Notes v1.11

## Release software v1.11 for OG-Hi5-4K-Plus

### Introduction

---

OG-Hi5-4K-Plus openGear card v1.11 software is a maintenance release. It is highly recommended that you update to this version of software.

Be sure to consult the Installation and Operation Guide (user manual) for detailed information about features and configuration guidelines. The most current documentation can always be found on the [OG-Hi5-4K-Plus Support Page](#).

### Features, Updates and Improvements in v1.11

---

#### Version v1.11

- Fixes an issue where the RGB Range mode was missing the “Auto” input option.
- Fixes an issue when converting RGB to YCbCr, where YCbCr would be the wrong range depending on input and output RGB range settings.

### Updating Software

---

*Note: DashBoard software (free) is needed to update software, configure, and monitor AJA openGear DashBoard supported cards. <https://www.opengear.tv/frame-and-control/control-system/download/>*

1. Check the AJA website for new software for your OG-Hi5-4K-Plus. If new software is found, download it and uncompress the file archive (zip). [OG-Hi5-4K-Plus Support Page](#).
2. Click the Upload button in the lower panel of the DashBoard Control System to open the Upload Software Wizard.
3. From the Upload Software Wizard window, select Browse.

4. Navigate to the location of the downloaded .bin file containing the software update. Select the .bin file, then select Open. The Upload Software Wizard window displays characteristics of the selected file for uploading.
5. Click Finish.
6. When the progress bar indicates that the uploading is finished and status indicates "Complete," click OK.
7. To verify the version of software or firmware currently installed on your card, select the Card tab from the center panel of DashBoard.

*NOTE: Before the upload begins, DashBoard will erase the firmware on the card, taking approximately 20 seconds.*

## Technical Support

---
