AJA eMini-Setup v2.4.4 for macOS - Release Notes

macOS Control Software for AJA Mini-Converters, HELO Plus, HELO, ColorBox, DANTE-12GAM, IP25-R, and KUMO Routers and Control Panels

Introduction

eMini-Setup is AJA's compact utility for configuring network settings and applying firmware updates across the following AJA devices:

- AJA HELO Plus
- AJA HELO
- AJA ColorBox
- AJA DANTE-12GAM
- AJA IPT-10G2-HDMI, IPT-10G2-SDI, IPR-10G2-HDMI, IPR-10G2-SDI, IPR-10G-HDMI
- AJA IPT-1G-HDMI, IPT-1G-SDI, IPR-1G-HDMI, IPR-1G-SDI
- AJA IP25-R
- AJA KUMO Routers and Control Panels, with firmware v4.5.0 and later (with USB port)
- AJA Mini-Connect

Obtaining eMini-Setup

eMini-Setup software for macOS can be obtained directly at this link:
- https://www.aja.com/products/aja-emini-setup#support

Manuals for the above products are available via the support sections of their product pages on the AJA website:
- https://www.aja.com/support

Firmware Upgrade Procedure

In order to use eMini-Setup to update firmware for the above products, please refer to the appropriate individual product manual(s) as outlined above. Note that eMini-Setup cannot update firmware on ColorBox.

Fixes, Changes and improvements in eMini-Setup v2.4.4

- This software corrects an issue when using macOS 26.x (Tahoe) where users were unable to complete Network Setup activities.

Known Issues

- This software is compatible with macOS v13 ("Ventura") or later. Users running macOS 12 or earlier should NOT install this software. Users running macOS 12 or earlier should use v2.4.3 of this software instead.
- All KUMO routers and control panels (with USB port) must be updated to KUMO firmware version 4.5.0 or higher before eMini-Setup can see it and be used to configure it.
- Communication with IPR-10G-HDMI, IPR-10G2-HDMI, IPR-10G2-SDI, IPT-10G2-HDMI, IPT-10G2-SDI may be problematic on some Macs, or a Mac running some versions of macOS, in particular 2008 and older Mac Pros running OS X 10.11.6 or earlier. If you encounter this issue, insert a self-powered USB hub between the Mac and the IPR/IPT device.
- Communication between a Mac and AJA Mini-Converter may be negatively impacted by certain USB hubs or extender cables. If you experience connectivity issues, try using a different USB hub, directly connecting the AJA Mini-Converter to your Mac or PC, and eliminating any passive USB extension cables.
- When user authentication is disabled using eMini-Setup, open login pages will not redirect automatically. On Mini-Connect, click the "Login" button without a password. On KUMO, HELO, HELO Plus, IPT-1G-SDI, IPT-1G-HDMI, IPR-1G-SDI, IPR-1G-HDMI, IPR-10G-HDMI, IPR-10G2-HDMI, and IPR-10G2-SDI, point the browser at the device's IP address and click the "Login" button without a password to log back in. For ColorBox and IP25-R, simply point the browser at the devices IP address.

Technical Support

AJA Technical Support is free and available to help answer questions or resolve issues with any of your AJA products.
