## Qualified Compact Flash (CF) Cards

There are a large number of CompactFlash (CF) cards available in the marketplace, however not all CF cards provide sufficient bandwidth for use with the AJA Ki Pro Mini. The following CF cards have been tested and are AJA qualified for use with the AJA Ki Pro Mini as of April 2011.

Please make a careful note of the specific CF card versions listed above. CF card manufacturers may have more than one type of CF card offering in their product line.

Using non-qualified CompactFlash cards with the AJA Ki Pro Mini is strongly discouraged. Using non-qualified CompactFlash cards may result in dropped frame warnings, media mounting issues, or other problems.

This list may change as new CompactFlash cards become available. Visit the AJA Ki Pro Mini support web page for the latest AJA-qualified CompactFlash cards for use with Ki Pro Mini:
