

AJA Control Room[™]

AJA Control Room is professional media software for macOS, Windows, and Linux, enabling 8K/4K/HD/SD workflows in numerous powerful ways. AJA Control Room is designed to be used with AJA hardware devices, and it can also operate as a stand-alone media player with full-screen playback and host system audio monitoring, supporting high quality professional media file types and formats.

\$0 US MSRP

AJA Control Room is unified cross platform software for playback, ingest, monitoring, and output with AJA products. Whether you're using files on a network, Broadcast IP, or even tape, experience the same smooth interface on macOS®, Windows® or Linux®.

AJA Control Room also includes cross platform support for the entire Apple ProRes family of codecs on Windows, Linux, and macOS, as well as H.264 and H.265, DNx, uncompressed, and much more.

AJA Control Room comes bundled with the associated Windows and macOS hardware drivers for Io® and T-TAP®. Installing the Desktop Software package will automatically install AJA Control Room and these drivers and application plug-ins.
