

## AJA System Test

---

System Test is included in retail software builds for KONA, Io and T-TAP products, and is used throughout the industry to provide accurate and detailed evaluations of drive performance statistics. This information allows users to predict the capabilities of any drive system for recording and playing back various resolutions and codecs.

\$ US MSRP

*Note: The downloads for System Test Lite v12.5 from this page are for the Apple Store and Windows standalone versions of System Test.*
