

KUMO 6464-12G

KUMO 6464-12G offers increased capacity for larger configurations while maintaining a compact 4RU profile with support for 12G-SDI/6G-SDI/3G-SDI/1.5G-SDI from 64x 12G-SDI inputs and 64x 12G-SDI outputs. Supports ganged dual and quad port routing control, allowing users to group together multiple inputs and outputs for Dual Link, Quad Link 4K/UltraHD, and 8K/UltraHD2 workflows.

\$14999 US MSRP

KUMO 12G-SDI routers support large format resolutions, high frame rate (HFR) and deep color formats while reducing cable counts when transporting 4K/UltraHD over a single SDI link. The routers offer network-based and physical control using KUMO CP and CP2 and mirror the physical form of AJA's production-proven KUMO 6464 routers, with a USB port for configuring IP addresses via AJA's free eMini-Setup software.

Built to the same quality standards as all AJA KUMO products, KUMO 6464-12G is the ideal choice for any situation where a balance of size, performance and capacity are critical such as post facilities and mobile trucks.
