

ROI

AJA's ROI family of scan converters allow exceptionally high quality conversion of computer and video signals in a small Mini-Converter form factor. ROI offers Region of Interest support allowing computer signals including DVI, DP and HDMI, to be scaled and converted to SDI video. The new ROI-SDI also supports video-to-video with Region of Interest extraction via 3G-SDI input to 3G-SDI and/or HDMI. With incredible image scaling, extensive aspect ratio and frame rate conversion, ROI fulfills the need to scale computer and video to a desired resolution, all in realtime, in a very portable and easy to use package.
